Project Highlight: Laboratory Equipment

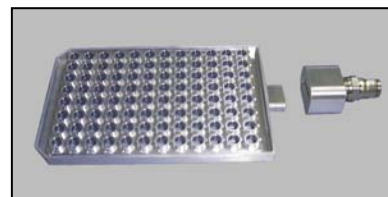

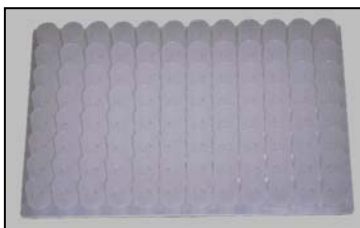

Dispensing machine for multi-well apparatus. Patent pending. Handheld device with control system to perform multiple functions. Withstands harsh chemical environments.

Solvent dispenser for multi-well apparatus. Withstands harsh chemical environments.

Carrier for array of bottles. Used in processes for DNA testing and analysis.

Multi-well plates and tools for drug discovery and combinational chemistry. Patent pending.

KSE has developed tools, equipment, and high production parts for use in the laboratory for applications such as genetic analysis, DNA testing, drug discovery and combinational chemistry. Many of KSE's designs and equipment are patented or are patent pending.
